SAFER FOOD SOLUTIONS

TableCraft® Provides Solutions to protect & serve your customers.

From prepping to serving food, TableCraft offers Safer Food Solutions™ that provide food safe practices, improve efficiencies, reduce waste, and promote cleanliness and sanitation within your establishment.

COLOUR-CODED SYSTEMS HELP PREVENT CROSS-CONTAMINATION

Cross-contamination is the transfer of harmful bacteria to food from other foods. TableCraft's **colour-coded cutting boards** and utensils promote food safe practices by designating foods to colours for safer food prep.

COLOUR-CODING SPEEDS UP PREPARATION

Colour-coding speeds up food preparation while providing a system that ensures accuracy and organisation.

Our **Widemouth™ Silicone Sauce Bands** allow you to easily identify contents. Custom imprinting available to label with your own unique sauces and condiments.

PourMaster® Silicone Bands

make identifying the contents of your PourMaster® easy! Dishwasher safe silicone bands are flexible and easily fit onto the neck of your PourMaster®.

FOOD ROTATION MANAGES THE QUALITY AND SAFETY OF FOOD.

Minimise waste, ensure proper food rotation, and save time with our selection of **Dualway™** and **NSF® InvertaTop™ squeeze bottles**.

CROSS-CONTAMINATION FROM FOOD AND FOOD CONTACT SURFACES

One of the most overlooked vehicles of cross-contamination are cardboard film & foil dispensers. Cardboard is absorbent and cannot be washed easily; allowing it to easily harbor microbial germs, contaminants and pests.

Keep your film, foil and food more sanitary while saving money with our selection of Film & Foil Dispensers.

COLOUR-CODED SYSTEMS HELP PREVENT CROSS-CONTAMINATION

Cross-contamination is the transfer of harmful bacteria to food from other foods. TableCraft's colour-coded cutting boards and utensils promote food safe practices by designating foods to colours for safer food prep.

CLEANLINESS HELPS PREVENT FOODBORNE ILLNESS

Cleanliness is a major factor in preventing foodborne illness. Everything that touches food should be clean. Our **Ridal Collection™ Serving Baskets** are dishwasher & microwave safe – allowing your kitchen to run more efficiently by saving time and keeping to Safer Food standards. Our **NSF® Ribbed Ramekin Family** allows condiments to be plated in an easy to clean, portion controlled manner. Our **PourMaster®** series keeps your bar tools more sanitary and easier to clean.

PREVENT “CROSS-CONTACT” OF KNOWN FOOD ALLERGENS OR GLUTEN

TableCraft has the dedicated tools to help prepare and label foods for your **allergen sensitive and gluten intolerant** guests. Adhering to a process assures the elimination of cross-contact of known allergens to your food prep and serving solutions.

KEEP YOUR CONTENTS SAFE AND COVERED

Our **Tethered Caps** keep contaminants and foreign particles out of your squeeze bottles or oil & vinegar bottles and ensure safe food practices in your kitchen. Squeeze bottle tethered caps are available in assorted packs; allowing you to colour-code your squeeze bottle contents.

ENSURE SAFE & SANITARY PRACTICES BEHIND YOUR BAR

TableCraft's **Universal Liquor Pourer Covers and Dust Caps** are the sanitary solution to keep contaminants out of your liquor bottles. Liquor Pourer Covers and Dust Caps comply to most local bar regulations and are dishwasher safe.

EU Regulation High Chairs

EU HIGH CHAIRS

Keep your child seated safely with TableCraft's EU Compliant High Chairs. This simple, yet contemporary design is available in three different colours to match any setting: white, natural & walnut finish. Durable, hardwood construction with washable replacement straps allows for easy cleaning with a damp cloth.

To ensure we are constantly exceeding the demands of the European legislation for our EU Compliant High Chairs, we have replaced our highchair straps to offer additional security by switching from a two point buckle to a stronger three point buckle.

To minimise any concerns, the new 67EU replacement straps are designed to fit the chairs without any additional assembly.

Our High Chairs comply with BS EN 14988:2006 Pt 1&2+A1:2012.

- Space saving, stackable design for easy storage
- Easy to clean with damp cloth, no food traps
- Adjustable 3-point waste strap harness
- Available in white, natural & walnut finish
- Pre-assembled or flat packed

NSF® Listing

This catalog was printed December 2017. Item listing is constantly updated, please see NSF®.org for the latest listing information.

Stainless Steel (Tri-Ply).....

Stainless Steel cookware is dishwasher-safe. However, we recommend hand-drying the cookware immediately after the rinse cycle or hand-washing and drying to preserve the original finish. Prolonged exposure to high heat settings may cause your cookware to discolour. To recondition your cookware or to remove stubborn spots and stains, use a nonabrasive pad and quality Stainless Steel cleanser such as Bar Keepers Friend®

Naturals.....

The “Naturals” are made of a food safe cast aluminium without coating and are NSF® approved. These items can endure temperatures from -28 up to 230°C. When using a non-caustic detergent, the product is dishwasher safe. Staining will occur if acidic foods are put into the natural products.

Coated Cast Aluminium.....

All Coated Cast Aluminium products are NSF® approved and will endure temperatures from -28 up to 100°C. (DO NOT BAKE in the coated cast aluminium products). If a defect in the coating appears, such as peeling or chipping, the product must be taken out of service immediately and repaired or replaced. The intended purpose of the colour coated products is for serving & display only. They are not to be used in the preparation of food. Some environmental uses are, but not limited to, buffet lines, catered environments, and in food display cases. Do not cut directly on the products, as this will cause the coating to scratch. Do not put any of the products in an oven, on a stove top, under a heat lamp or in any other condition where the temperature exceeds 100°C. Washing by hand is recommended, but when using a non-caustic detergent, the coating is dishwasher safe. Do not clean with scouring pads. Only use nylon or sponge pads. Regular dish washing will dull the coating. Do not use metal utensils on the colour coated products. NOTE: Staining of all colour coated products will occur especially if used with acidic foods. The lighter (white, ivory, sky blue, and grey) colours are more likely to show stains than darker colours. Staining of products is not covered under warranty.

Cast Iron.....

Our line of Cast Iron is pre-seasoned, however it is still important to seal the surface of cast iron through a process called “seasoning”. This makes the cookware less likely to stick, protects it from corrosion and rust, and prevents food from taking on metallic flavours. With proper care, a well seasoned pan will only get better with time and last for several years. Wash the pan thoroughly in hot soapy water, then hand dry immediately. Using a cloth or paper towel, grease the pan thoroughly with a thin coating of vegetable oil or melted vegetable shortening. Be sure to coat the entire surface, including all corners. Heat the oven to 150°C. Place the cookware in the oven for 1 hour. Remove while hot and allow to cool to room temperature. Wipe away any excess oil, being careful not to scrub clean, then store.

To preserve the seasoned finish, cast iron must be cleaned differently from other types of cookware.

Cast Iron should never be placed inside a dishwasher or scrubbed with scouring pads or steel wool. Instead, wipe the pan clean with a sponge or dishcloth in hot water, without detergent. Any residue may be removed by boiling a little salt and vinegar in the pan, or by rubbing with a paper towel and coarse salt. Hand dry immediately after washing and brush with a thin coating of vegetable oil before storing. If stacking pans, place a paper towel between them. Pans should be seasoned from time to time when needed. Cast iron cookware is heavy and care should be taken when lifting; where available, use side handles for extra stability. Always use heat protection gloves as handles will become hot. Allow cookware to cool before cleaning. Cast Iron is not microwave safe.

Enamelware Collection.....

Enamelware is a time-honored traditional cooking and serving vessel that has been used for centuries in many ways. A good quality enamelware product can last for years under the right conditions and cared for correctly. Just like any other porcelain piece in the market, porcelain enamel coated steel is not chip resistant and can become worn over the years. The steel substrate of the products is incredibly strong; however the porcelain coating is susceptible to chipping if handled roughly or repeatedly dropped on a hard surface.

Caring for enamelware products is simple, if you adhere to the following care and use instructions. To extend the life of your enamelware products, we recommend the following: wash before use, do not use abrasive cleaning or scouring pads, do not place empty enamelware on a heating element or allow them to boil dry on induction units, gas and electric hobs. Before use, coat with a light coating of cooking oil to protect the enamelware from staining; then after use, to remove baked on food or stains, soak in warm soapy water and wash gently with non-abrasive liquid detergent.

Enamelware products are: commercial dishwasher safe (high & low temp), heat safe up to 300°C, induction safe, safe for direct flame and freezer safe. Enamelware Products are not microwave safe.
